Hello Grant,

please find attached short description of Noreika and Skirpa answers by genocide centre. Basically those are shortened translations of GC replies.

Also please find attached talking points that emphasis the essence of centre fraud and documented version of true history. I focus on promotion of our side of story not defending against GC nonsense. I focus on Noreika as Skirpa is not so strong and debatable issue. Probably recent attitude of centre you can see from my memo on main arguments given in recent Noreika reply - its all nazies fault, all lithuanians were subordinate to nazies, no freedom of action... thats centre's recent defense.

I attach documents I wrote about in talking points. You have them from before, but these are probably the most important, if you copy them to file you should see original headings in english describing the content of document, all them are mentioned in text and were sent to Genocide centre with query. Their answer does not mention a single document presented, no analysis of them whatsoever.

I think on the go we might add something for BBC interview.

I also attach a notice for prosecutor regarding criminal proceedings against Burauskaite and GC. This document I gave for delivery to prosecutors office, it should land there soon. As it is criminal proceedings, it would better not to publish openly this document yet, because data of unfinished prejudicial investigation is considered secret according to law. It would be better to publish it when prosecutor will refuse to draw Burauskaite and GC to responsobility or the case goes to court.

I think next job in the line is appeal to ethic committee.

I will send an invoice for the job done to this point with next e-mail.

Kind regards
Rokas
