

Public Reproducibility Appendix

105-Event Documentary Matrix for “105 Events. Eight Tests. One Pattern.”

Grant Arthur Gochin | Frozen source matrix: 8 October 2026 | Public edition: 10 October 2026

Reading rule

The source matrix contains 105 rows (E01-E105). E85 is a retired reconciliation row merged into E94-E95 and is retained only to preserve audit history. Eighty-four unique active events carry at least one C1-C8 code and generate 118 overlapping test assignments. Of those 84 counted events, 83 have a public source path below; E53 is under source verification.

The appendix omits internal strategy fields. Rows marked CONTEXT, THEORY, P-01, MERGED or similar are preserved for audit history but are not part of the 84-event C1-C8 denominator unless they also carry a C-code.
