President Donald J. Trump
The United States of America

Subject: *Gratitude for Ending the War on Gaza.*

Dear Mr. President,

We wish to express our sincere gratitude for your leadership and unwavering commitment to ending the war on Gaza. Today marks a historic turning point — the day when the guns fell silent and the possibility of peace returned to a land long scarred by suffering.

As you know, Gaza lies in ruins. Entire neighborhoods have been reduced to rubble, hospitals and schools destroyed, and livelihoods lost. Thousands of families mourn their loved ones, and generations of children have known little but fear. Yet amid this devastation, your efforts have restored to us the most vital of human needs: **hope**.

The task ahead is immense. Rebuilding Gaza must mean more than reconstructing buildings — it must restore dignity, trust, and opportunity to a people who have endured years of blockade and hardship. We look forward to your continued leadership in helping Gaza rise again: to rebuild essential services in health, education, and water and sanitation; to revive livelihoods and strengthen social protection; and to guide the transition from emergency relief to sustainable recovery and lasting stability.

Beyond physical reconstruction lies a greater challenge — restoring ownership and voice. The people of Gaza must be at the heart of rebuilding their own future. Recovery cannot succeed if it is managed *for* us rather than *with* us. What we need now is a framework that not only delivers relief but also rebuilds confidence, ensures fairness and accountability, and grants Palestinians a genuine role in shaping their future.

In parallel with the efforts for reconstruction and peace, we also stress the importance of continuing the work toward a final and just resolution to the conflict, and the establishment of an independent Palestinian state in accordance with international legitimacy and United Nations resolutions, ensuring lasting peace and security for all peoples of the region.

After years of hardship, Gazans long for normalcy — to raise their children in safety, to work, to learn, and to contribute as equal partners to a peaceful and prosperous region. If this moment of peace grows into lasting recovery, it will stand as one of your enduring legacies — a moment when leadership transformed suffering into renewal. A stable Gaza is not only the foundation of a stable Palestine but also of a more secure and thriving Middle East and world.

We would be deeply honored to welcome you to Gaza, to witness firsthand the resilience of our people and the renewal your leadership has helped make possible. Your visit would symbolize the triumph of peace over war and remind the world that recovery rooted in dignity and justice is the only path to lasting stability.

With deepest appreciation and respect,
